PROFILE	Highly motivated iOS Developer with a strong foundation in building API-driven applications using Swift, UIKit, and SwiftUI. Experienced in implementing Clean Architecture, MVVM-C, and reactive programming (Combine/RxSwift) alongside local data persistence like Core Data and Realm. Actively seeking an iOS Developer role to deliver high-quality, high-performance mobile experiences.
WORK EXPERIENCES	Content Creator 2024 – 2025 Heather Beauty (Online Shopping) - Designed the official brand page logo and created engaging visual and textual content focusing on cosmetic products. - Developed and managed content schedules (post scheduling) to maintain a consistent social media presence across platforms. - Monitored page engagement, tracked customer inquiries, and gained a deep understanding of online retail and e-commerce workflows. Graphic Designer 2020 – 2023 T&T Sticker Design Company Ltd. - Collaborated with clients to transform concepts into clean, high-quality stickers, street signboards, and corporate logos. - Utilized CorelDRAW to create and refine precise vector designs based on client requirements. - Operated vinyl cutting and printing software/machines, managing color adjustments, prepress scaling, and final production to ensure top-tier product delivery.
PROJECT EXPERIENCES	IOS Developer Project 2024 – Present CodeWithChris, HackingWithSwift & Project Cinemax — SwiftUI, URLSession, and Core Data - Architected a high-performance movie app using Swift and Clean Architecture to ensure modularity and 100% testability of business logic. - Integrated TMDB API via URLSession, implementing data pagination and custom image caching to minimize network overhead. - Engineered offline persistence using CoreData for seamless, real-time watchlist management. Lamp: E-Commerce — UIKit (Programmatic UI), Combine, MVVM-C - Developed a reactive networking layer with Combine and URLSession for dynamic product fetching and smooth UI binding. - Utilized CoreData to enable persistent local storage for cart management and secure user sessions. - Designed a programmatic UIKit interface featuring custom tab navigation and an interactive checkout simulator.

EDUCATION
EXPERIENCES

East Yangon University | 2016 – 2020
Bachelor of Science in Geology

Yangon University of Distance And KMD | 2016 – 2017
Post Graduate Diploma in Information Technology – Institute of System Science

CERTIFICATES

Cisco Certified Network Associate 2020 Youth International College	Android Developer 2022 PADC.com.mm
IOS Developer 2024 CodeWithChris	SwiftUI / UIKit 2025 HackingWithSwift

SKILLS

Languages : Swift

iOS Frameworks : UIKit (Programmatic UI), SwiftUI

Architecture & Patterns : Clean Architecture, MVVM–C, Modular Framework

Networking : REST APIs, URLSession, JSON Parsing

Persistence : Core Data, Realm, UserDefaults

Reactive Programming : Combine, RxSwift

Tools : Xcode, GitHub, Sourcetree

LANGUAGES

English (Conversational) **Myanmar (Native)**
